HERB'D™

CERTIFIED ORGANIC

HERB'D™ Complete Probiotic Fermented Superfood by

herbaliving

The world's most powerful Bio-Active Probiotic Fermented Superfood

About HERB'D™ Complete Probiotic Fermented (CPF) Superfood and Herbaliving Australia

As a result of over 20 years of research, **HERB'D™ CPF Superfood** is scientifically formulated with a unique combination of herbs, whole foods and naturally occurring good bacteria, developed through our exclusive 3-week multi layered organic fermentation process.

People face ever-growing health concerns on a daily basis resulting from poor nutrition and diet, pollution and exposure to contaminants in their environment, including polluted water and soil, viruses and other parasites, and life-related stressful events. Surrounded by these constant negative and damaging factors, the result is poor health, illness and sadly in some cases death.

Our mission at **herbaliving Australia** is to help boost people's health in an easy-to-take superfood with a highly charged and powerful nutritional make up that can combat these negative environmental factors. **HERB'D™ CPF Superfood** achieves this by super-charging a person's health and strengthening the body's natural healing and recovery processes.

What Makes HERB'D™ Complete Probiotic Fermented Superfood Special

The unique combination of herbs, whole foods and naturally occurring good bacteria in **HERB'D™ CPF Superfood** is a breakthrough in the world of nutrition and will become the benchmark upon which all Superfood Blends will be measured. No other food in the world can offer this level of molecular nutrition.

The Lactobacilli bacteria used in **HERB'D™ CPF Superfood** have been subjected to a broad number of stressors including heat, cold, chlorine, salt, alcohol and many preservatives found in food, resulting in a "Super Family" of very strong Lactobacilli unlike any others found in the world today. The effective probiotic found in **HERB'D™ CPF Superfood** contains Lactobacilli bacteria that can:

- Maintain its high and active count through processing and storage until consumption
- Tolerate the acid conditions of the stomach
- Tolerate bile salts
- Increase its own numbers in the bowel and decrease the numbers of competing bacteria

The unique formulation provides the complete Lactobacillus family of 14 strains combined with 18 Herbs, 13 whole foods for 3 weeks prior to bottling. During this three-week preparatory phase, the formula is pre-digested by the lactobacilli in the same way it is in our own body. When consumed, the body instantly assimilates the broad spectrum of nutrients, making it highly bioactive and resulting in the highest level of nutrient absorption.

As well as the complete Lactobacillus family, **HERB'D™ CPF Superfood** also includes organic Spirulina, Mung Beans, Red Lentils, Brown Rice, Quinoa, Chick Peas, Amaranth, Pearl Barley, Soy Beans, Rice Bran, Chlorella, Beetroot, Spinach Powder, Milk Thistle, Sweet Potato, Ginseng Siberian, Tulsi (Holy Basil), Oregano, Fresh Ginger, Turmeric, Golden Seal, Cabbage, Lovage, Caraway, Yarrow, Thyme, Dandelion Root, Ginko Biloba, Rosemary, Cumin, Parsley, Garlic, Clove.

Benefits of HERB'D™ Complete Probiotic Fermented Superfood

pre-probiotics

bioactive

organic

vegan

integrated fermentation
